

Transparency Report July 2019

Main take-aways of the month:

- July started convincing with the launch of MN023, however, was impacted by a few very large withdrawals towards the end of the month.
- In order to accommodate the larger withdrawals, we had to take down a masternode for the first time since the launch in Sep18.
- It was also the first time that we experienced a net outflow in the pool. Larger withdrawals are typically seen in times with high volatility, which also occurred in July.
- CrowdNode's pool of masternodes got a record total of 87 rewards - up 10 from the previous record set in May.
