

Transparency Report June 2019

## Main take-aways of the month:

- We added one new masternode, MN022 during the month and had MN023 in reach.
- Further, growth was offset by a few very large withdrawals of altogether 1385 Dash.
- Mid June the CrowdNode team gathered in a Summerhouse in Denmark to set out strategy and intensively work on the platform. New motivation was gathered and we are looking ahead with great spirit and lots of interesting ideas.
- During the month we added support for the Dash Investment Fund Supervisor election. Interestingly, the CrowdNode results came pretty close to the actual results as seen on the right.

### Active balance per 30. June 2019: 22.591,07 Dash

The active balance comprise deposits which have endured a full qualification period (1 reward payment) and thus earns fractional payments.

### How to calculate your fractional payment:

Your fractional payment =  
 $\text{Reward} \times \text{Your active balance} \times (1-0,15) / \text{Total active balance}$

### New features/upgrades:

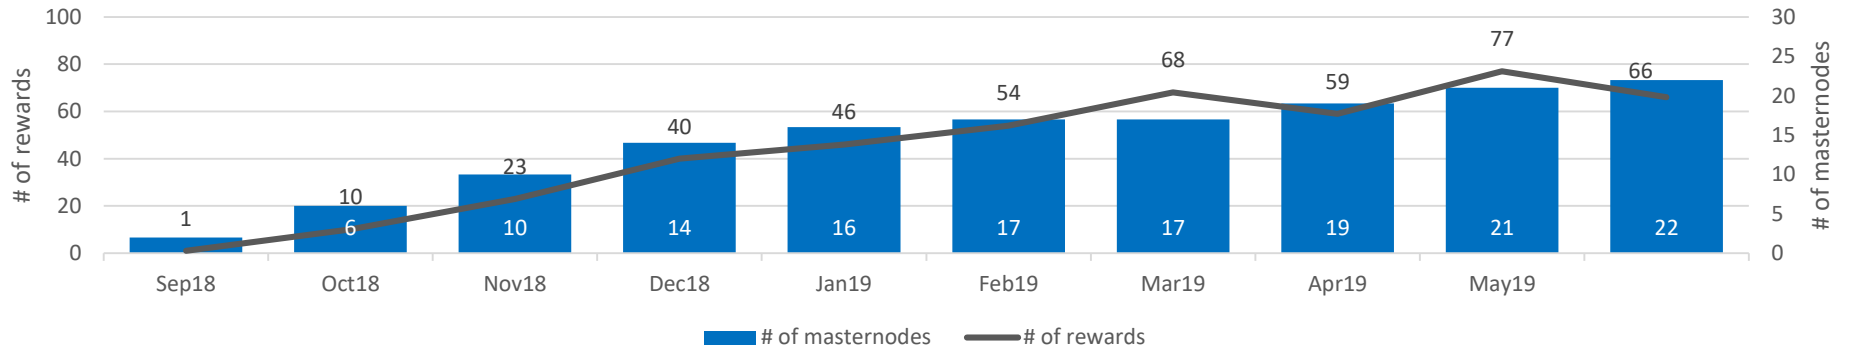

- We changed the queuing process on our job engine to simultaneously run deposit and balance updates along with longer lasting jobs (e.g. processing of rewards). This has resulted in funds appearing faster on the platform. Due to the recent concentration of rewards being processed at the same time, it took too long time to show deposits.
- Voting implemented for Dash Investment Foundation Supervisors.
- Changed the source of the Insights-lookup to the official Dash Insights.
- Implemented a range of better admin features in order to automate more processes.

### Incidents:

- During the start of June we discovered some inconsistencies in regards to processing of overall 10 reward payments in the “generate” category. We have subsequently processed the rewards and developed the platform to ensure that future rewards will be properly processed.
- No further incidents have occurred, except smaller maintenance issues which caused some PoSe-scores.
