

Main take-aways of the month:

- 1 new masternode was added to the pool.
- We processed the largest single withdrawal so far amounting to 565 Dash.
- Development of the CrowdNode-platform has been at full speed during the month and are ready to introduce two new features.
- First new feature is a new service for Masternode Owners:
 - Register your Masternode with us, point your rewards towards our hotwallet and automatically gain payments from them.
 - We identify the payment automatically through an automated lookup process.
- Second feature to be rolled out is VOTING.
 - We know that many have requested this feature. You will now be able to vote on your favorite proposals and have your say.

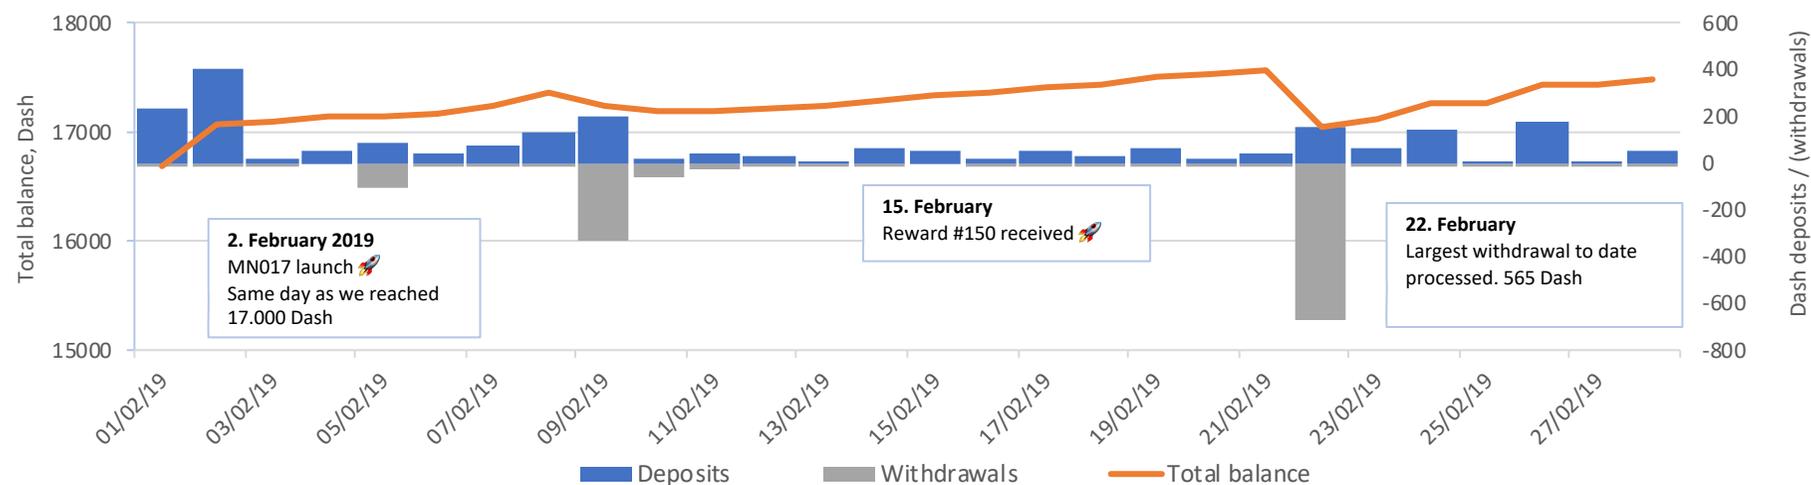

Fun facts:

- We reached a milestone of 150 reward payments during the month.
- MN004 managed to get 5! rewards during the month.
- Two of the rewards came in two consecutive blocks. This can happen when the Masternode gets selected for payment 10 blocks in advance and then is lucky enough to be chosen again before being removed from the queue.
- When Spork15 is activated this will not be possible anymore.

The active balance comprise deposits which have endured a full qualification period (1 reward payment) and thus earns fractional payments.

How to calculate your fractional payment:

Your fractional payment =
 $\text{Reward} \times \text{Your active balance} \times (1 - 0,15) / \text{Total active balance}$

New features/upgrades:

- No new features were rolled out during February, but lots have been developed 😊
- By the issuance of this report all our masternodes are upgraded to 13.1 and DIP3.

Incidents:

- We have had a few hardware-related incidents where the server went down and unfortunately we didn't manage to recover the queue position. This was related to MN011.
