

Transparency Report May 2019

## Main take-aways of the month:

- Due to the steady growth in the number of masternodes the level of monthly rewards hit a new all-time high of 118,2 Dash.
- Subtracting our own fees, **rewards distributed to our members** amounts to more than **100 Dash in May** and more than **500 Dash accumulated**.
- We added two new masternodes, MN020 and MN021, during the month and had MN022 in reach.
- On 21. May 2019 our customer #500 signed up to our platform. Needless to say, we are very pleased with the increase in members. Thanks a lot.

### Active balance per 31. May 2019: 21.936,33 Dash

The active balance comprise deposits which have endured a full qualification period (1 reward payment) and thus earns fractional payments.

### How to calculate your fractional payment:

Your fractional payment =  
 $\text{Reward} \times \text{Your active balance} \times (1 - 0,15) / \text{Total active balance}$

### New features/upgrades:

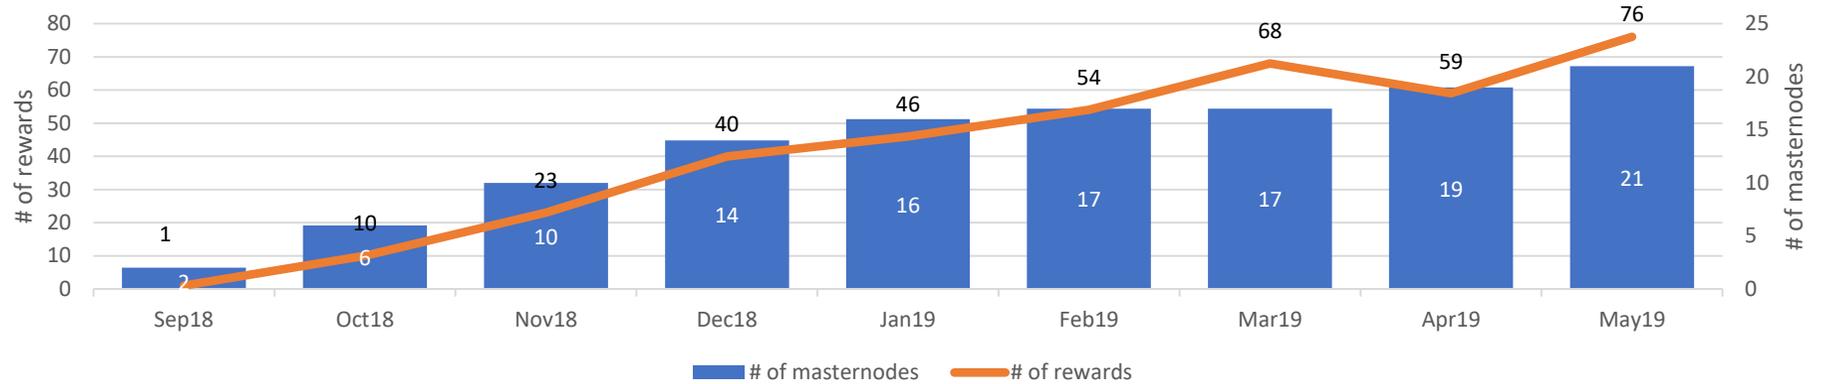

- We changed the queuing process on our job engine to simultaneously run deposit and balance updates along with longer lasting jobs (e.g. processing of rewards). This has resulted in funds appearing faster on the platform. Due to the recent concentration of rewards being processed at the same time, it took too long time to show deposits.

### Incidents:

- We started out with a small downtime on our platform, due to a worldwide DNS-problem with Microsoft Azure. Fortunately, it had no consequences for the Masternodes and the problem was solved within a few hours.
- During the start of June we discovered some inconsistencies in regards to processing of overall 10 reward payments in the "generate" category. We have subsequently processed the rewards and developed the platform to ensure that future rewards will be properly processed.
